Chat with your test data

Zwick Roell

We Break Things. Precisely.

80 Million Tests. Every Year.

The Hidden Problem

Precision in Testing. Primitive in Analysis.

Zwick Roell

The Users

Brilliant Engineers. Not Data Scientists.

- Complex databases
- Multiple data sources
- Algorithm selection uncertainty
- No time for data prep

The Vision

Redefine Human – Data Interaction

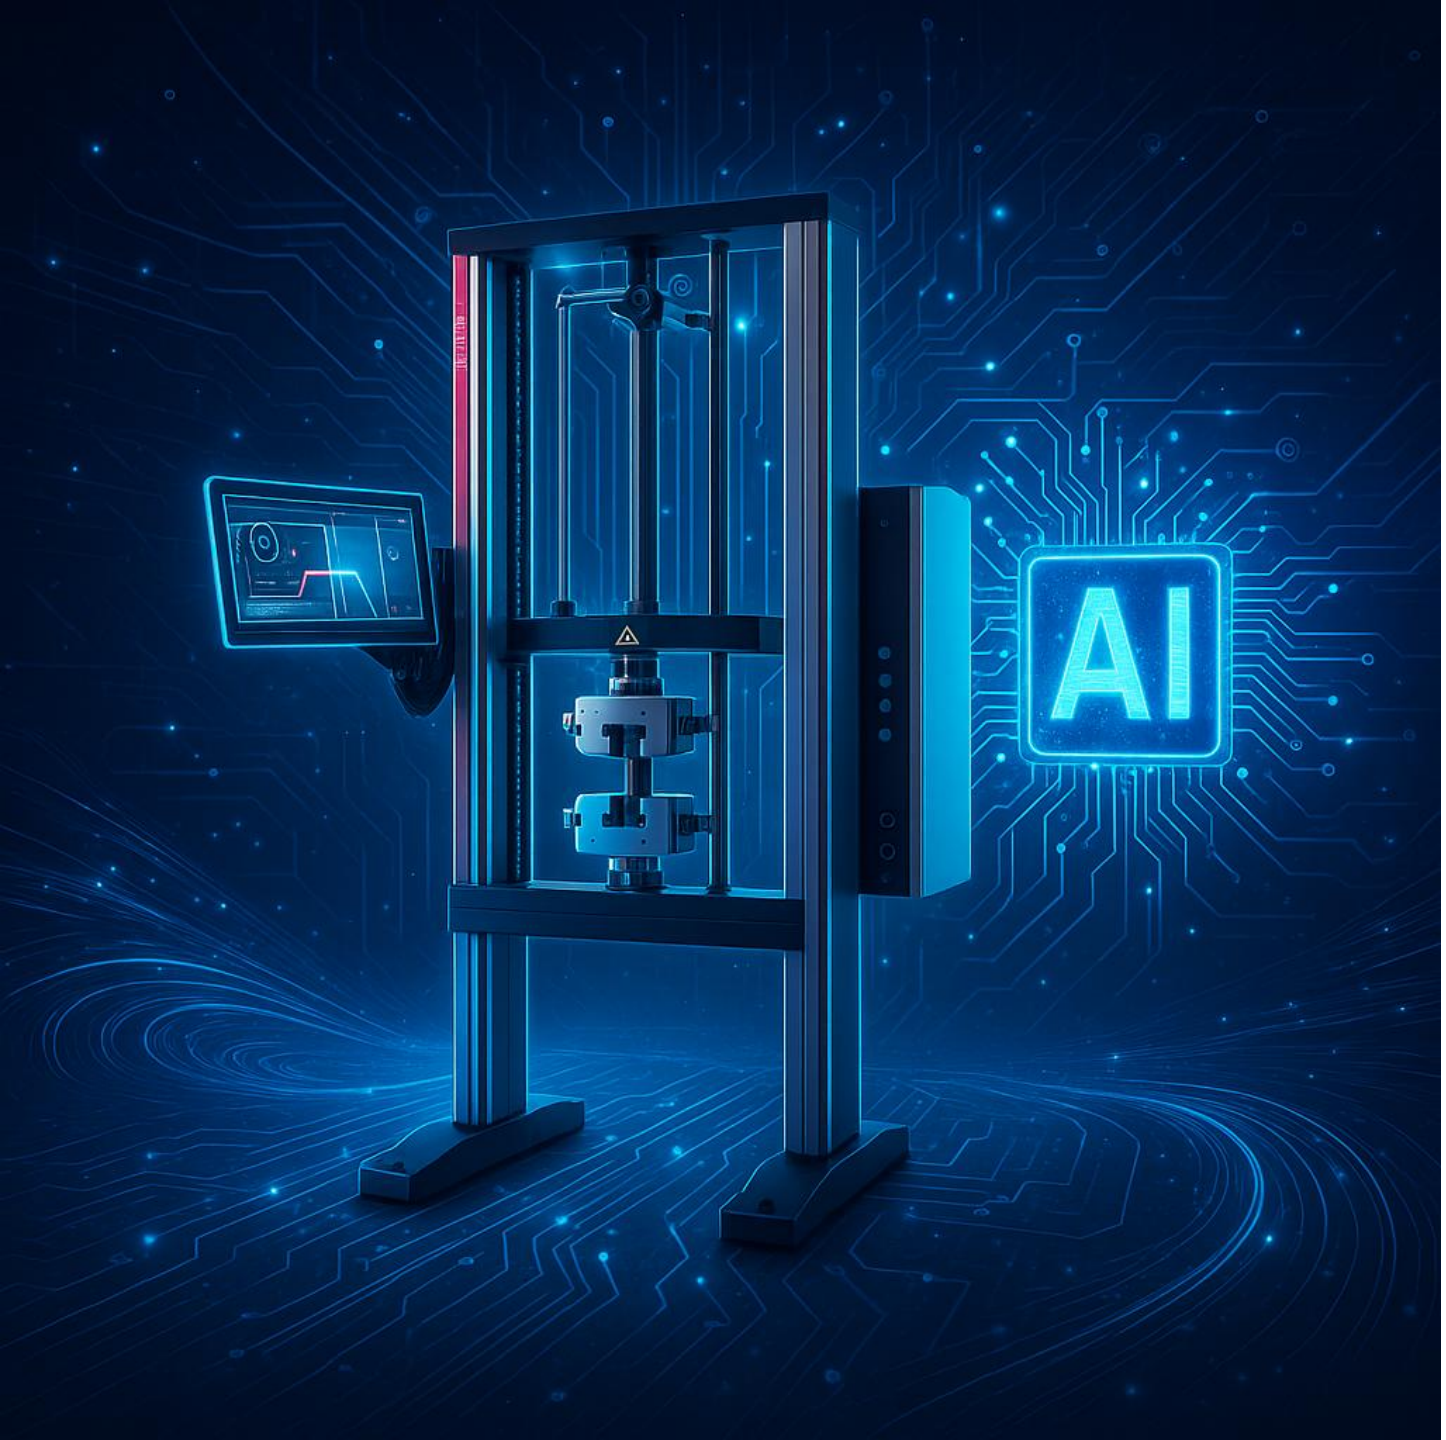
- Natural language
- Automatic data selection
- Smart model choice
- Instand code generation & execution
- Clear explanation
- Visual + verbal output

Do my Z05 and Z20 machines produce significantly different results?

Is there a degradation in the tensile strength of the material Hostacomp G2?

Summarize all available material properties for Fancyplast 42.

Do my Ulm and Kennesaw sites deliver comparable quality?



The Challenge

Your AI Lab Colleague

We provide:

- Real lab dataset
- Industrial context
- Product ambition

You provide:

- LLM + Agents
- Smart pipelines
- UX innovation

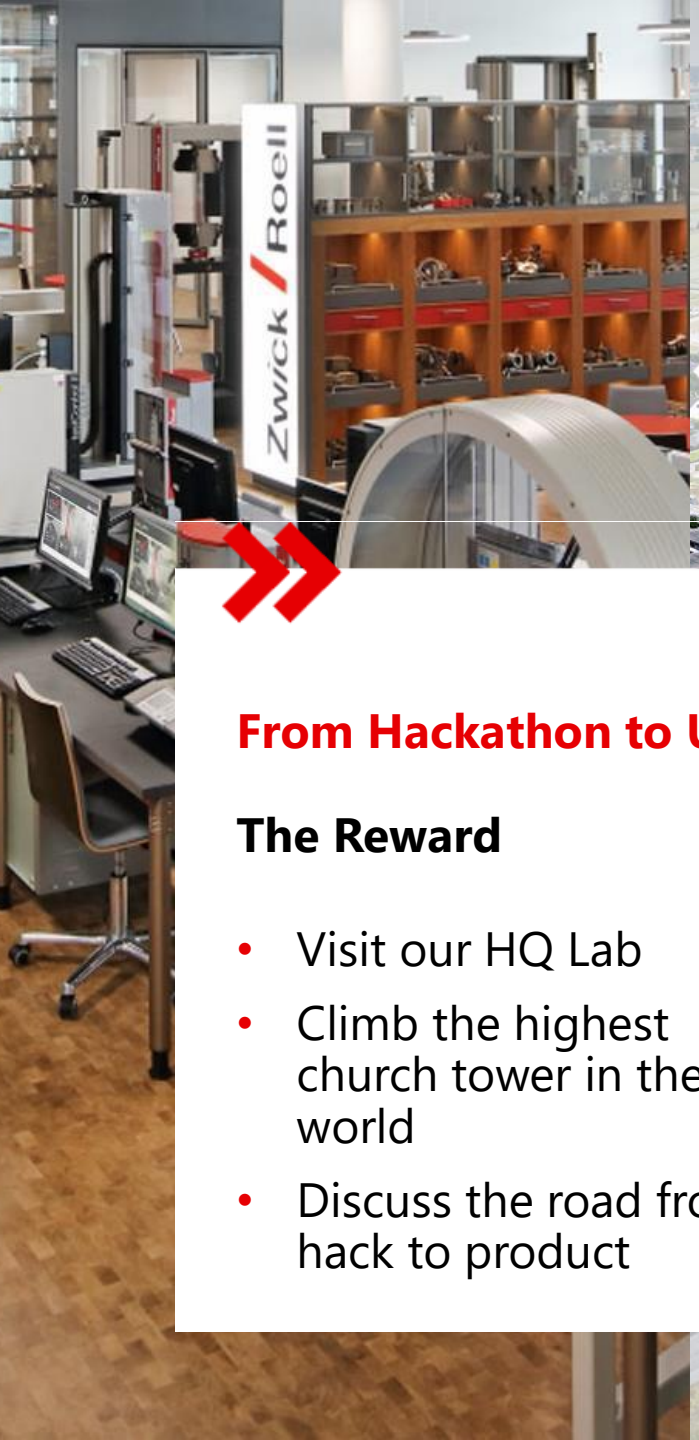
Zwick Roell

Why This Case Wins

Build Something That Ships.

- Global industrial footprint
- Real business impact
- Scalable product vision
- Direct path to implementation

Zwick Roell



From Hackathon to Ulm

The Reward

- Visit our HQ Lab
- Climb the highest church tower in the world
- Discuss the road from hack to product
